

## **STORIES OF THE YEAR 2025, by the 5th-8th graders of Inspired Youth November 2005**

### **1. By Johnsha J.**

It's the year 2025. I am now 32 years old. I live with Khadijah in Beverly Hills, California next door to Paris Hilton. We have two little dogs named Skittles and Payton who are both girls. Skittles is a Golden Retriever, and Payton is a Yorkie. Khadijah is a lawyer and I am a famous dance choreographer.

I travel to Rome, Paris, Puerto Rico, and Mexico. I travel there on business and sometimes vacations. I have plenty of friends such as Kelly Clarkson, Paris Hilton, and Avril Lavigne. I'm dating Jesse McCartney. He lives around the corner from me. Alexandra Sparr just made a new video and I helped her with the choreography. 2 weeks after her album "AOS" came out it went platinum

The year 2025 is a great year full of surprises. After my traveling I setted down for a while. I'll inform you later what happens in the year.

### **2. By Cesar G.**

I would be 32 years old in 2025. My job will be important to me. I will be a doctor and take care of people. I will be living in Europe and traveling to Antartica for vacations. People will be driving less because there won't be a lot of gas. It's going to be exciting in 2025 because countries will get along better.

In the year 2025 I will be 30 years old. To take care of my self I am going to be a police. I went to the training to be a police to work well and know well.

My family is great we are in total 7. I think that the phone will be different. They will change. I think it will not --. I think CDs, DVDs, cameras, will be like new things on it.

I am going to travel to Mexico. I am going to see my grandpapa. I think that we will have more oil. It is dificult to decide about a car how will they be.

I think they are getting along good. I think I world will be different when we are grow up but I dont want to live this country.

### **4. By Shonesha J.**

In the year 2025 I would be 30 years old. The things that would be important to me would be my kids, Tony Jr., Shonesha Jr., and my husband Tony Whittier. Our home in New York has lots of food and water.

I want to be a teacher. I would want to teach 3rd grade because they are not too young or not too old. I would teach every subject on the overhead. I would finish high school and college with honors.

I would go to the store to get a cellphone for \$50.00. I would check to see if the cellphone has internet, tv, and radio. If it does I would love it. Then I would go to get a computer for the kids. I would want the computer to have movies and games to help them learn, and a calendar.

My family and I would travel a lot. We would go to Mississippi, California, Minnesota, and Africa. The scarce natural resources would be trees and gas. People would not use paper.

People would get along by talking to each other. They would be working together. Some of them would travel together. This is my life in 2025.

### **5. By Miguel A.**

In the year 2025, I will be 30 years old. My job will be a teacher. I need to go four years of high school, and college.

My family is very big. My family is planning a bautism for my cousin April, she is four years old.

Cell phones will communicate from each other. With the computer you could play games, and look for stuff. You could hear music with the CDs, and you could watch movies with DVD.

I'm going to travel by airplane. I'm going to Mexico, and I have gone to Six Flags.

They could get along by being friends and be nice to each other.

Summary: My favorite subject is Math. I like to play with my friends, and my sisters and cousins. That's what I like to do.

### **7. MY LIFE IN 2025! By Deirdre C.**

In 2025 I would be 33 years old. The things that would really be important are my

family, my career and the man that I'm courting. I would be a lawyer because I put up a good argument. I would have to have a undergrad degree, a law degree, and at least a masters. Gather all my facts, always satisfy my client. Work my hardest in everything I do. I would want to move my grandmother out to Tennessee and live by my sister Marisol. Trey Kim would be my husband. Most people would have robots in their homes doing almost everything. Some things on cell phones will be 3D and will talk to you. Computers will be portable and will be a mix of tv and all other things. They will all be created into one. I would like to go to Brazil, Europe, Australia, and Turkey. Oil for cars will be scarce. They're using electricity in place of oil. The countries will get along. That's my life, 2025.

### **8. By Alex S.**

I am going to be 31 years old in the future. Something important for me is playstation 5 and Exbox 36. And most of all is my famaly. My job is a police. So I am going into police academy.

When I check outside I need to get my things outside so there is no crime. My family is cool and I like my family. The cars will float. They will have camera on it and computer. They will turn on when we say on or off. They will be different and cooler.

Yes, I will travel because it will be so cool to see everything from the future. I'll go to New York it will be cool. Yes people will save water and resources. They will be friends in all the countries.

### **9. By Zuleyka A.**

In 2025 I would be 32. My job will be important to me. My job will be acting and then singing. I will go to acting school and I get to travel, be on TV, make money. I would have twins. The technology I would want is a car that drives by itself, and a voice activated food delivery system. You can use cell phones to travel in time. The computer is going to be voice activated to take you any where you want but in time and things will happen. I will go to act at Las Vegas, Hollywood, New York, Paris, France. People will get along good. The future will be cool.

And we could buy a cell phone and I will buy new cell phones and probably they will look different, probably it will light cool. And if I still have money I will buy a new computer and probably it will be some thing good. And I will travel with all of my family including my praents. And probably We could stay like a month or two months Maybe they will work and will be nice. And all the people will talk a lot

### **12. By Marco S.**

My essay will be about how life will be in 2025.

I will be thirty in the year 2025. A house will be important in my life because where would I live? Maybe when I grow up I will be a lawyer. I will have to go to college. I will help people buy their houses.

I have two brothers and one sister. All of them are older than me. One of my brothers is 18 and the other is 15, and my sister is 17. My mom is a housekeeper, and a supervisor.

Cellphones would have T.V.s in it. They will do what you say. The CDs will be smaller and the DVDs will be even smaller.

Yes, I will travel. I plan to go to Mars, and go to New York, and go to China. Trees will be scarce. They will protest and not use that much paper. They will send goods to each other.

The technology will be cool. It would be sad not having that much trees.

### **13. By Remi E.**

I want to travel to countries in Africa like Egypt, Ethiopia, South Africa, and Libya. I want to figure out what it's all about and I want to go visit people. I want to try out their food. Like in Nigeria they have soup over rice and they have olive rice. It has spices in it. I want to go visit Asia because it is the first biggest continent and China has the biggest population in the world. Plus I want to see their karate. But it's going to be too hot in Africa I am scared about that. In Africa they wear the scarf over their heads that protects them from the sun in some parts of Africa. Plus I want to visit Jamaica and Mexico and South America and Europe.
